Trainings

INTRODUCTION

The Institute of Information Security is the training arm of **NII Consulting** and is established by K. K. Mookhey and his team at NII with the aim of bringing you the best in information security training. We have put together a panel of brilliant trainers who have many years of experience in the exciting field of information security. We all believe that knowledge grows when it is shared

Training is one of the ways we share our practical experiences in securing various systems and technologies across platforms. In addition to training for security fundamentals, we want to provide training in advanced skills and make sure you benefit from our experiences.

Why we make a difference?

- We incorporate a progressive learning methodology, which aids the comprehension of techniques and tools alike while facing newer challenges.
- We have a set of standard courses outlined in different information security domains. However, we also offer customized courses for candidates from diverse backgrounds with requirements.
- We don't just finish the modules but ensure that you have learnt it right. We take comprehensive tests and quizzes at the end of the sessions.
- Our trainers are subject matter experts and possess practical knowledge of security issues faced by different organizations. Our trainers have worked on all platforms including mainframes and OpenVMS

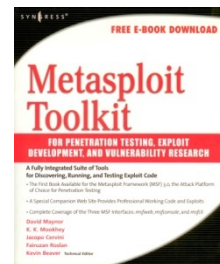

Comprehensive knowledge-transfer

In all our training exercises, be it part of an ISO 27001 implementation or an in-house workshop, our over-riding objective is a complete and comprehensive knowledge transfer to our participants. We lay the maximum emphasis on practical hands-on training, and believe that only by actually practicing the precepts can they be learnt best.

Committed to Security Research

We are one of the few companies actively engaged in security research. Here are some significant research results:

Books: 'Linux Security, Audit and Controls', an ISACA publication. Metasploit Framework, Syngress Publishing

INSTITUTE OF INFORMATION SECURITY

Trainings

Articles: Articles published at ISACA, Security Focus, and the Institute for Internal Auditors.

For details, visit, <http://www.niiconsulting.com/innovation/papers.html>

Presentations: We have been invited speakers at international conferences such as Black hat, IT Underground, Interop and IIT security conferences.

For details visit <http://www.niiconsulting.com/innovation/presentations.html>

Advisories: We have found security vulnerabilities in products from vendors such as Oracle, Microsoft, Macromedia, etc. For details, visit www.niiconsulting.com/innovation/securityadvisories.html

Testimonials:

The faculty support and the reference materials provided are very good. The instructor mode is also impressive. It definitely helped in grasping things quickly. The IT infrastructure provided to participants was good.

- *S.Mugunthan, Internal IT Auditor, Reserve Bank of India*

I appreciate for the training delivered during our stay at Mumbai. Thanks so much and let's keep in touch for any development on the area of IT Security.

- *Loserain W Saiterie, IT Security Administrator, Bank of Tanzania.*

It was a great learning experience and Excellent Team, Very Commendable.

- *Ogochukwu Frank, IT Manager, Nigerian Airspace Management Agency*

The workshop went off very well. I found it excellent.

- *MeenakshiSundaram, Technical Specialist, Risk and Compliance, Wipro Technologies*

The trainer's knowledge, presentation skills, and ability to respond to queries were excellent.

- *Vignesh Kumar N P, Asst. Manager, Security and Infrastructure, IngVysya*

Excellent course explained in simple language.

- *Tapos Bose, Manager -Telecom, INFOSEC*
